USOS O APLICACIONES DE VELOUR ROY

TAPICERÍA AUTOBUS Y AUTOMOTRIZ

Un mundo de
posibilidades
para hacer
crecer
tu negocio

Todos nuestros productos son de origen mexicano.

Las dubetinas automotrices cumplen con los parámetros de gramaje, composición y teñido requeridos por los sistemas de calidad automotriz. El proceso a base de flama garantiza y asegura que aun con las altas temperaturas generadas al interior del auto, no exista desprendimiento de la tela bondeada a la espuma, emisión de vapores tóxicos, ni olores.

All our products are made in Mexico.

The automotive textiles satisfy the criterion of weight, composition and dyeing, required by automotive quality systems. The flame based process guarantees and ensures that even with the high temperatures generated inside the car, there will be no, textile detachment joined the foam, emission of toxic vapor or odors.
